

Hot Water Vending Machine

Description

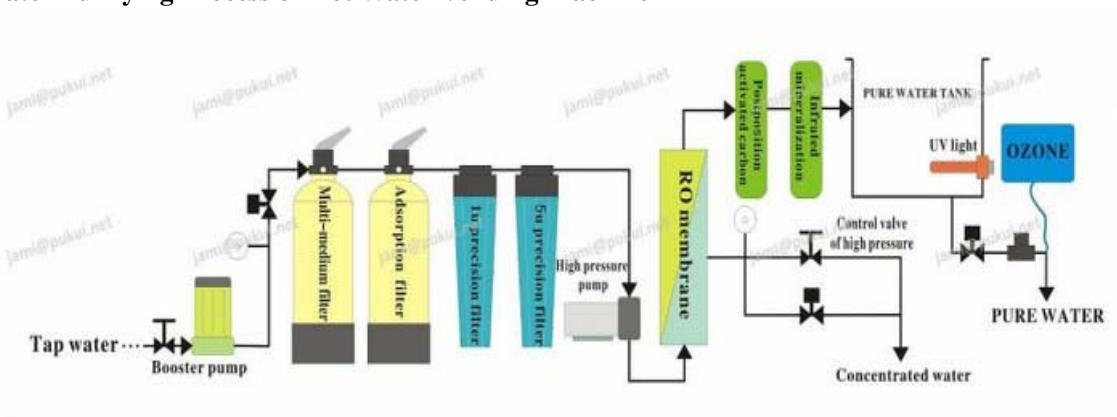

Water vending station is the hottest growth area in purified water businesses today. Hot water vending machine contains rich oxygen molecules that efficiently improve the oxygen-carrying capacity in water. Equipped with a heating system, it can provide hot water for 24 hours every day. Compared to previous thermal water vending machines, this vending equipment adopts the new electrical heating technique that can save 30% power and assure the water temperature is up to 90°C. Water vending station is often installed in community, campus, supermarket, street, etc. Hot water vending machine mainly consists of RO membrane, filter, powder coated steel cabinet, coin acceptor, bill validator and system board. Customers can buy purified water by coin or IC card.

Competitive Advantages

1. The hot water vending station enjoys the advantage of competitive price and good design.
2. Waterproof carbon steel cabinet and front door open design contribute to its safety, durability and easy installation.
3. Pukui hot water vending machines have gained CE certification.
4. Advanced RO purification techniques and 24-hour uninterrupted UV sterilization guarantee water quality.
5. Water production capacity of this automatic water vending station is from 400 GPD (1500 L) to 3000 GPD (11350 L) per day. It has a 24 L hot water tank.
6. Airtight filling and high concentrations of ozone sterilization eliminate the secondary pollution completely.
